Renmar John Morales

BS COMPUTER SCIENCE

SOFTWARE DEVELOPER | ASPIRING AI/ML ENGINEER

South Signal, Taguig | 0945 256 2476 | renmarjohnmorales@gmail.com | www.linkedin.com/in/renmar-john-morales-309aa8395

Projects

BABYCUE – LOCAL AI BABY MONITOR (APPBUILDERS PH HACKATHON) *2026*

- Co-developed a baby monitor in a 24-hour hackathon that flags sleep-position changes and nearby objects to parents
- Served as one of two ML Developers, training the model and building the local on-PC pipeline

DEVELOPMENT OF A HYBRID ESP32-ANDROID DRIVER FATIGUE DETECTION AND ALERT SYSTEM APPLICATION *2025 – 2026*

- Served as ML Lead in a co-developed two-node hybrid edge-computing system using a dashboard-mounted ESP32-S3-N16R8 with OV2640 camera as a wireless IP camera, streaming live video to a companion Android app for real-time driver fatigue detection
- Trained a custom TensorFlow Lite model to track facial landmarks and implemented it in the Android app to compute Eye Aspect Ratio (EAR) and Mouth Aspect Ratio (MAR), triggering visual/audio alerts and an ESP32-activated buzzer upon fatigue detection

CROSS-PLATFORM OFFLINE-FIRST INVENTORY SYSTEM FOR FAST FOOD CHAINS *2025*

- Served as Lead Backend Developer of a cross-platform inventory system using Flutter for fast food chains with multiple branches
- Built with an offline-first architecture to ensure continuous operations without internet, with automatic data sync upon reconnection

BUDGET TRACKER – ANDROID APPLICATION *2025*

- Served as Lead Backend Developer of an Android budget tracking app for logging income and expenses by category
- Included spending summaries and visual reports to support personal financial management

WEB-BASED SCHOOL SCHEDULING SYSTEM *2024*

- Co-developed a web-based scheduling system using VB.NET for managing class schedules, room assignments, and faculty loads
- Designed to minimize scheduling conflicts and streamline academic planning

ANDROID FOOD DELIVERY APP WITH REAL-TIME DRIVER TRACKER *2024*

- Co-developed an Android food delivery app using Java with real-time GPS-based driver tracking
- Implemented live order status updates, user authentication, and an intuitive ordering interface

DEVELOPMENT OF A WINDOWS-BASED 2D RETRO GAME OF TAGUIG CITY UNIVERSITY *2021*

- Co-developed a Java-based Windows desktop application with a retro-style 2D game environment themed around Taguig City University
- Integrated multiple minigames, a student application portal, and a university information module

Education

Bachelor of Science in Computer Science | Taguig City University 2023 – 2027

Senior High School - STEM | Taguig City university 2021 – 2023

Certifications

Comptia A+ Certification (2026 – 2029)

DatacCamp Understanding Data Engineering (2026)

Cisco Data Science Essentials with Python (2026)

Cisco Networking Basics (2026)

Skills & abilities

Technical Skills

- Android Development (Java/Kotlin)
- Backend Development
- Computer Networking
- Cross-Platform Development (Flutter)
- Cybersecurity
- Data Science
- Database Management (SQL, SQLite / MySQL / Supabase)
- IT Hardware Support
- Machine Learning
- REST API Integration
- Technical Support
- Troubleshooting
- Version Control (Git)

Programming Languages

- Java
- Python
- C#
- Dart (Flutter)
- VB.NET
- Kotlin

Soft Skills

- Leadership
- Problem Solving
- Communication
- Team Collaboration
- Project Management
